

Comprehensive data protection to meet all your operational requirements

Data is now so fragmented across different geographies and IT environments that backing it up is putting additional strain on IT teams already under pressure to deliver business innovation.

Backup as a Service (BaaS) from iomart offers rock solid protection for your data across a wide range of backup scenarios, delivered by a company that has been storing and protecting data for customers for two decades.

Whether you are a single site business or a multi-site organisation, and whether you want your backup on-premise or in the cloud, we have you covered.

iomart helps you make informed decisions about your data security and ensures that you can restore data quickly and cost-effectively in the event of a crisis, without disrupting your day-to-day operations.

WE PROVIDE A RANGE OF BAAS SOLUTIONS:

Backup as a Service from iomart

Cloud Backup Endpoint

Backup of individual devices across the internet regardless of location.

Cloud Backup Essential

Dual site backup – keeps a copy of critical backups locally – for organisations that need the ability to do rapid restores.

Cloud Backup Advanced

Dual site backup for organisations that need the ability to backup much larger amounts of data locally (30TB+).

Primary Site Backup

Managed dedicated on-site backup for organisations with strict compliance requirements.

Secondary Site Replication

For organisations that have invested in their own environment but want a fully replicated secure copy of their data off premise.

Hyperscaler Backup

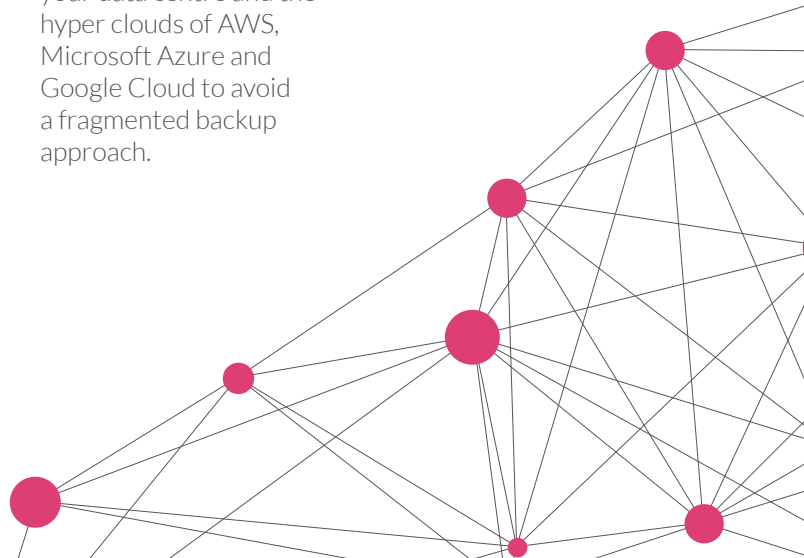

Unified backup across your data centre and the hyper clouds of AWS, Microsoft Azure and Google Cloud to avoid a fragmented backup approach.

SaaS Backup

Long term managed backup of SaaS platforms such as Office 365 and Salesforce.

Cloud Archive

Off-site backup for cold data not included in the regular backup schedules.

Why choose BaaS from iomart?

iomart offers a comprehensive range of Backup as a Service solutions to ensure you are fully compliant no matter what industry sector you operate in.

- ✓ Fully secure, encrypted and resilient
- ✓ Protects data on-premise and in the cloud
- ✓ Meets single site and multi-site requirements
- ✓ Scales with business requirements
- ✓ Flexible RPOs and RTOs
- ✓ Control and visibility via the iomart portal
- ✓ Delivers lower Total Cost of Ownership
- ✓ Fully managed, monitored and supported 24/7/365

Backup as a Service from iomart

Experience

iomart has been protecting data for 20 years. We have the skills, processes and technology to deliver the backup solution that best meets your specific business requirements.

Expertise

Our engineers are invested in providing comprehensive protection for your data, working with you to refine your backup schedules and retention periods and restore data rapidly in the event of a crisis.

Technology

No matter how complex your backup requirements, we have the technology to deliver the solution you need.

Security

iomart offers the most secure and industry compliant BaaS on the market. You can rest assured that your data is always fully protected.

Control

The iomart control panel allows you control and visibility of your backups.

Support

We support you with a fully managed, SLA driven service 24/7/365.

Pay as you Grow

A flexible, pay monthly solution, that can scale quickly as your needs change.

Protecting your data is important.
